

Why SPOT-ON

chemical dispensing

Spot-On takes the guess work out of setting up and maintaining chemistry in your wash so you can focus on running your business. The platform's intuitive interface, accessible from anywhere, makes new tunnel setup or swapping of chemicals a breeze.

Some key features and benefits of Spot-On include:

1 Control at Your Fingertips

- Supports infinite dilution and dispensing rates, allowing precise control over resource use from any web enabled device.
- Seamlessly adjusts chemical, water, and air flow without manual input or physical swapping of parts such as injectors or metering tips.
- Identify problems in the tunnel when chemical is not pulling at the specified level.
- Utilize any brand of chemical in your wash! Spot-On is not affiliated with any chemical providers.

2 Innovative & Intelligent

- Feedback loop ensures that desired setpoints are being met and will alert operators of anomalous conditions.
- Manages the cost of resources and mitigates environmental concerns due to overuse of chemicals and water.
- Able to adapt as cleaning needs change, be it seasonally, through vehicle recognition for optimal cleaning setup, or recent weather conditions.

3 User-Friendly

- Offers user-friendly convenient navigation with intuitive design.
- Personalized Dashboard displays performance metrics aligned with your business goals and operations.
- Multi-site operators seamlessly navigate between locations, viewing operations across all sites.
- Provides vital insights on system health, along with robust auditing and security controls.

4 Facility Monitoring

- Monitoring capability can be extended to any device on the network (ex. motor control cabinet).
- Health alerts and error conditions visible in the dashboard for all equipment in the ecosystem.
- Supports sensors for water and gas service for measurement of true overhead cost.
- Security and auditing controls to monitor user access.

- Your Control
- Our Technology
- Spot-On Precision

BEYOND CHEMISTRY.

SPOT-ON CHEMICAL DISPENSING

Spot-On Chemical Dispensing PRO Portion

- Control up to 8 chemicals per panel
- Unlimited set points and dilution rates
- Make changes on the fly onsite or remotely without the need for metering tips
- Interfaces with existing chemical dispensing systems
- Pinpoint precision saves on chemical cost & reduces waste

Dimensions: 30" x 20" x 10.56".
120V power. Ethernet connection required.

 **Spotless is not affiliated with a chemical provider. Your Chemicals. Our Technology.**

Spot-On Chemical Dispensing Standard | PRO

- Control up to 8 chemicals per pod
- Air and water regulation control
 - ⚠ *Automated air control available on PRO unit only*
- Internal feedback loop ensures accuracy
- Storage rack and tanks for 8 chemicals with chemical usage monitoring
- Optional chemical pump with continuous monitoring
- Make changes on the fly onsite or remotely without the need for metering tips
- Pinpoint precision saves on chemical cost and reduces waste

Side View

Water and air service required. Dimensions: 94.86" x 52.22" x 26.37". 120V power. Ethernet connection required.

Spot-On Platform Systems

Spot-On Master Control System (MCS)

- Powers multiple pods
- Includes inventory management, equipment monitoring & Gateway license for remote access
- Monthly subscription required

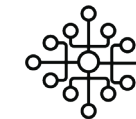

Purchase required w/PRO or Standard pod. Includes 17" touchscreen IP65 monitor. Dimensions 24.5" x 24.5" x 9". 120V power. Ethernet connection required.

Spot-On Gateway Server

- Powers multiple PRO Portion panels.
- Includes equipment monitoring & Gateway license for remote access.
- Monthly subscription required.

Purchase required w/PRO Portion panel. 120V power. Ethernet connection required.

Spot-On Platform System Add-Ons

Enterprise Module

- Control room dashboard for multi-site management give visibility across all operations
- Configurable to support multi-level management and organizational structures

Utility Cost Module

- Pinpoint accuracy for overhead costs for all utilities consumed in an operation
- Alerts and notifications allow for immediate correction in the event of a problem

Water Quality Module

- Online sensors provide water hardness data and will alert operator of anomalous conditions
- Active monitoring of water temperature and pH levels

Health Monitoring Module

- Health monitoring for all equipment used for car washing
- Alerts and notifications for predictive maintenance

Maintenance Module

- Equipment knowledge base powered by AI for technician reference
- PM schedules tailored to wash facility and alerts to drive adherence

Full Facility Module

- Health check for entire facility including alarm system, camera system, etc
- Supports full facility preventive maintenance with alerts to drive adherence

Why Customers Love SPOT-ON control platform

“With Spot-On, you can simply enter the dispensing parameters and start running cars. It takes the time required to dial in the cleaning process for a tunnel from days down to hours.”

Bill Blair, Blair Ceramics

“Spot-On is easy to use and the pinpoint accuracy of readings lets us know right away if something is off with an applicator in the tunnel, for example.”

Steve Bynum, Big Splash Car Wash

Where Precision Meets Simplicity... it's Spot-On!
